Dear Carl,

**MSc Construction Management (Project Management).**

I refer to your letter and Project Management assignment No 2 dated 22 January 1998. It took me a while to mark, as you can imagine. I returned it to Ms McLean on 06 February 1998.

I marked the assignment at 98%. This is the highest mark that I have awarded to any assignment since I started at Heriot-Watt University in September 1994. It is the best assignment, either group or individual, that I have seen in that time. It would have been a very good assignment if it had been produced by a group of five or six people. I think it is quite remarkable that you were able to produce it on your own. Overall, it more or less meets the standard that I would be looking for in a 'real' SPP for a Client in industry.

I would like to congratulate you on producing a remarkable piece of work. Well done.

Yours sincerely,

Dr W A Wallace.  
Course Leader Construction Management.
